

IMPORTANT NOTE FOR WINDOWS VISTA/ WINDOWS7/8 USERS.

WINDOWS 8 users should run the installer as the Windows Administrator. Download the free trial and 'Save' to your PC.

Click on the Windows folder on your Desktop task bar and browse to the Downloads folder.

Click on the 'Downloads' folder then right click on laitwebinstaller.exe. Click on 'Run as administrator'.

BEFORE you run the installer on a Windows Vista or Windows7/8 computer you must disable 'User Account Control'. Follow these steps to ensure 'User Account Control' is disabled BEFORE you attempt to install LiveAuctionIT on a Windows Vista PC.

- Click the Windows Start button
- Click on 'Control Panel'
- Double click on 'User Accounts'
- Click on 'Turn User Account Control on or off'
- Make sure the check box 'Use User Account Control (UAC) to help protect your computer is UNCHECKED.
- When UNCHECKED click on OK
- Now you can install LiveAuctionIT
- If you want to re-enable this feature after installing LiveAuctionIT follow the above steps and make sure the box is CHECKED when you click OK

After installing you will be able to use LiveAuctionIT with User Account Control enabled. However, the Backup program will not work and you may not be able to install LiveAuctionIT updates. For these reasons you may want to leave User Account Control disabled.
